Breakout room #1

Copilot for M365:

True business asset or passing fad?

Bankdata is currently exploring Microsoft Copilot for M365's potential. In this session, you'll get a closer look into how Copilot for M365 can assist you in your daily work, together with a demo of its inner nature, core features and functionalities. Designed especially for non-developers, this talk aims to shed light on Copilot for M365's practical value.

Martin Lærke and Ditte Lund Storvang

Breakout room #2

The digital bank: From feature thinking to a channel platform strategy

Discover how we're empowering more teams to collaborate on the platform to enable our customers digitization. Suited for audiences not involved in the digital bank, this talk also explores the many pitfalls of this approach.

Rune Lippert

Breakout room #3

Enhancing DevEx with Automation Highway

Discover how our new Automation Highway initiative is set to transform the developer experience. This talk highlights the difference it will make in streamlining development workflows.

Kenneth Bøgedal

Tech talks II

13:15 – 13:45

Breakout room #1

Revisiting our favorite security flaw: Unmasking the auth-pocalypse

Remember how we tackled broken authentication at last year's summit? Buckle up for this year's reveal as we uncover the most implemented security issue of 2023. Brace yourselves for a deeper dive into the technical aspects, tailored for our developers.

Daniel Milo Farkner

Breakout room #2

How Generative AI in finance is shaping our future

Generative AI is revolutionizing the finance sector. Explore its impact on our business and the broader implications for the industry's evolution, including what our customers expects from us.

Peter Bering

Breakout room #3

New Developer Portal: Onboarding Made Simple

Say goodbye to the onboarding complexities with our new developer portal. Discover its core functionalities in this demo session, and see how it can smooth out your path to building innovative solutions.

Thomas Højmark Grønbæk and

Frederik Sørensen
